

I personally find it incredibly convenient to be able to listen to traffic reports on XM radio, as I do commute from San Ramon to Concord and would like to know whether or not to avoid certain freeways. This is invaluable to allowing me to show up to work on time. I urge you to continue to allow this service to operate because it will allow me and many other people to avoid traffic congestion, which is very important. I do not prefer listening to FM/AM radio stations for traffic because they are not 24 hours a day/ 7 days a week about traffic. If I need to know about traffic to avoid it, I need to know as soon as I turn the radio on. Otherwise, I may find myself in traffic and unable to get out when the FM/AM broadcast their traffic reports.  
Thank You so much for listening to my voice.

Sincerely,  
Tim Davis
